352-LHR

Very good resistance to potato leaf-hoppers. Excellent yield and forage quality compared to alfalfas, but especially LHR varieties. Proven performance over last 3 years.

421-BR

Well adapted to poorly drained soils. Excellent forage quality and tonnage. Outstanding winter-hardiness & traffic tolerance. Can support an aggressive cutting schedule.

535-HY

Breaks dormancy early with rapid regrowth for outstanding yields of dairy quality forage. Excellent persistence, together with very good winter-hardiness and traffic tolerance. Well adapted to well drained soils throughout Ohio & surrounding area.
